If your hair is mostly straight at the roots and more defined waves form below your eye level, your waves are Type 2b. If your waves start right at the roots and you have very defined waves mixed with actual ringlets, then you are Type 2c.Curly HairType 3 hair has more defined, springy curls that form spirals or ringlets. Those with Type 3 hair are mostly concerned with reducing frizz and adding definition. They use creams and gels, and avoid drying ingredients (like sulfates) to give their curls definition, and they're more likely to avoid drying ingredients in their shampoos.If your curls are similar in size to the large sidewalk chalk you used as a kid, then you're Type 3a. If your curls have the circumference of a Sharpie, then you're Type 3b. And if your curls have the circumference of a pencil or a straw, then you're Type 3c. Many people believe (and we tend to agree) that Type 3c curls are almost their own category, because they are much tighter corkscrews and generally have much more volume than 3a and 3b curls, yet they are still very different from Type 4. YouTubers with Type 3c hair include heygorjess and Shinestruck.Coily HairType 4 hair can appear much shorter than it is (which is known as shrinkage).For those with Type 4 locks, it's all about moisture and preventing tangles. Conditioners with lots of slip and moisturizers are must-haves in a coily girlsçÄÄ product lineups. Slip refers to how the product lubricates your hair and describes products (i.e., daily conditioner, deep conditioner, or leave-in conditioner) that are usually applied during washing and detangling.If you look closely at a strand of hair and it looks like a small, tight S-shape, you're seeing Type 4a coils. Type 4b coils have more of a Z-shape and a cotton-like feel. If you have Type 4c hair, then your coils donçÄÄt clump into a or çÄÄcoilçÄÄ unless you wear a specific style like a twist-out.There are many hair-typing systems out there, and many also argue that curl pattern doesnçÄÄt matter. We think it matters because the way one woman pineapples her Type 3c curls at night may not work for anotherçÄÄs Type 3a hair. And while it seems like everyone cançÄÄt get enough of coconut oil, not all hair types should use it in the same way. For example, Type 2 wavies might find more success using coconut oil as a pre-shampoo treatment while someone with a tighter texture might use it to seal her ends with a moisturizer.With so much information out there, focusing on tips and reviews from those who share your curl pattern will likely be more beneficial than advice from people in a different category, preventing hair fails that make you want to reach for the flat iron. As with all things, it takes trial and error, but knowing your curl pattern can help cut down on the error. S curl is a hair product that you put in wet hair, curling your hair. It's a cream, and you put it in your hair and twist it around. And then you put a shower cap on, let it sit for about 15 minutes, and then rinse it out. When using this product, make sure that the section of hair you're twisting around is not too big, or there won't be enough products to hold the curl. And make sure that your hair is wet before you put the s curl in; otherwise, it won't work as well. So, let's dive into the pros and cons of S Curl Texturizer and see how it can turn out for you.S curl is a great way to add some definition to your curls or give them more body if they're feeling a little limp. And it's also great for creating bouncy waves. So if you're looking for a product that will help you curl your hair, s curl is the product for you.What are the Pros of S Curl Texturizer?S curl is a great product because it helps to define your curls and give them more body. If your hair is feeling limp, S can help give it more life. And if you're looking to create bouncy waves, s curl is the product for you.1. Hair GrowthHair growth is a natural process that requires nourishment and a healthy scalp. Several different methods can be used to promote hair growth, including using a texturizer. S curl is a hair care product made up of natural ingredients and is designed to improve the health of the hair and scalp. It can be used to promote hair growth and reverse hair loss.2. Conditioning Without Weighing Hair DownMany conditioners will weigh down the hair and leave it greasy. S curl is made from natural ingredients, so it will help condition hair without weighing it down or leaving it looking or feeling greasy. It can be used as a daily treatment and a weekly deep conditioning mask to support healthy hair growth.3. Healthy Hair Growth is one of the Primary Pros of S Curls curl can also promote longer and faster healthy growth of the hair. The active ingredients allow nutrients to reach the scalp, encouraging new cell production required for healthy, fast-growing hair. It can also be used alongside other treatments such as laser comb therapy to give the best possible results.4. Prevents Hair BreakageWhen using s curl, hair can be less prone to breakage. The active ingredients will strengthen the hair and improve elasticity and flexibility. This means that it is much more difficult for hair to snap or become damaged due to long-term wear and tear.5. Maintains Moisture LevelsLike other conditioner types, s curl can help maintain moisture levels in the hair, and it's among many countable benefits of using texturizer. It does this by creating a protective layer on the outside of the hair strand that locks in hydration without leaving any greasy residue behind, which can lead to frizz.What are the Cons of S Curl?There are a few potential cons of using s curl. It might be difficult to find a quality S curl product. Another is You could give your hair if you don't use it correctly. There are some prominent inconveniences of using texturing. 1. Bulky/ Difficulty using the river can be a bit bulky and differ of using. The cream needs to be twisted around the hair firmly, which can be difficult to do if your hair is long. Nor is it the most easy -to -rinse of hair. 2. Extreme Breakagesplit hair can be caused by the application of chemical products to your hair, especially if you use many of them. It is another of the reasons why this list is so long. Because your hair threads weaken and your scalp dries, it is easy for your hair to break or fall by only. Hair breakage is an indication that your hair needs more attention instead of a texturizer. 3. It is not suitable for all types of hair s curl is not suitable for all hair types. For example, if you have fine or thin hair, you may not give it an appearance you want because it can be very heavy and leave your hair looking greasy. 4. Non -availability is one of the consumptions of S Curls is not easily available in stores, so sometimes it can be difficult to find. It is also more expensive than other market products, but some customers feel it is worth paying for a product that works effectively. Now, to the most conscious texturing in the form of more dicas invoices. 5. Irritation (Skin & eyes) s curl contains some hard chemics that can irritate if they get in touch with the skin or eyes. Some clients also complain that he leaves the white flakes in their hair after the use. However, this is often temporary and will disappear after washing hair again with shamp⁹. Conclusion on pros and conscious pelolo that makes the curl stand out from other similar products in the It's their natural ingredients. There are no chemicals, artificial dyes or harmful substances that can damage the hair. Instead, it works to improve the health of the scalp and encourage new cell growth to give it stronger, stronger,hair that grows faster than normal. But, you should not forget that everything is chemical based and should be able to detect the difference through texturizer before and after application. Frequently asked questions
